

Making the Cosm

A third year project

[33127405] Alexander M. Roche

Creative Computing

Supervised by: Brock Craft

Contents

Abstract	1
Introduction	1
Definition of Terms	2
Background Literature	
-Auditory Displays	2
-Sonifying Go	3
-Sonifying the Higgs Boson	3
-Sonification of Scientific Data	4
-Real-time Sonification of Physiological Data in an artistic performance context	4
-Monitoring Real-Time data streams : A sonification approach	4
Specification	4
Methods	6
Technologies Chosen	6
Design	
-Sonification Interface	7
-Makey Makey to Cosm Interface	9
Implementation	
-Styling and dynamic DOM of the netChimes client.	9
-Interface MakeyMakey with Javascript and record information.	12
-Writing backend code for personal web-based netChimes station to stream information to the cloud.	13
-Create a user interface for the map/sonification part of the project.	16
-Write feed retrieval backend for location interface and implement location interface	17
-Implement feed selection and committing to a list	22
-Implementing data point graphing	24
-Implement user selection of sounds and assignment of sounds	25
-Implement playing of sounds.	27
Evaluation	
-Function in comparison to specification	28
-Does the system fulfil original requirements?	28
-User Testing Results	28
-Project Shortcomings	30
Conclusions and Future Work	
-How successful was the project	31
-Future Work	32
Bibliography	33

Appendices

-A : Git Repository	1
-B : Cosm Datastream JSON object example	1
-C : Highcharts chart creation example	2
-D : Chosen data points to sonify	4
-E : Audio format dependencies per browser	5
-F : Audio data JSON structure	5
-G : Sample Consent Form	7
-H : Work logs	8
-I : Full source code	
--MakeTheCosm/index.html	8
--MakeTheCosm/css/bootstrap.css	8
